

# THE EXPERIENCES WITH A STRANGER

A private, individual performance with Sonia Gómez.

At a pre-arranged time on a particular day, you will enter the life of another person, a stranger – although it won't just be any old person, but an artist who will work for you according to a series of rules that she will propose and you will follow and improvise on based on each situation.

The experiences are real, and the type of practice is agreed upon in advance.

A simple, preliminary analysis will be carried out through a series of questions, and a specific performance-experience will be created for each client.

A team of professionals from various fields will contribute to producing each experience. The duration and the price will depend on the practice chosen.

## CATALOGUE OF PRACTICES
